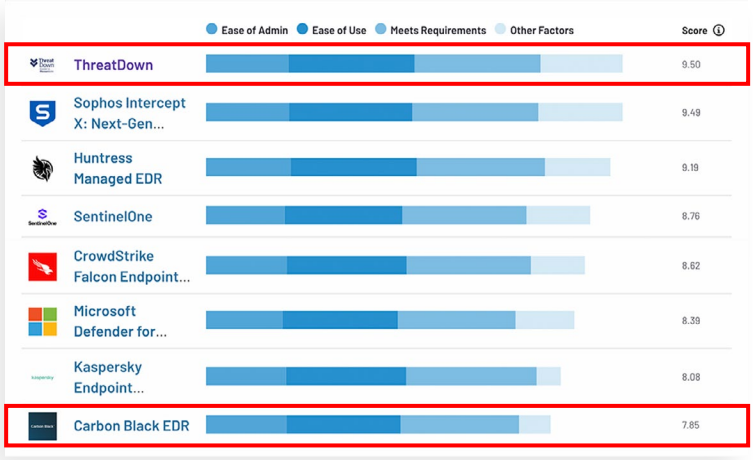
Carbon Black Leaving You in the Dark?

If you aren't receiving the same level of support you once were, or are just unhappy with your current level of protection, come check out why ThreatDown has been awarded, peer-selected and recognized by analysts, IT practitioners and third-party tests.

Take threats down with ThreatDown

- Received EVERY certification, 10 quarters in a row by MRG Effitas
- The ONLY vendor to consistently achieve 100% protection against ransomware, phishing exploits and every other test
- Awarded "Product of the Year 2024" by AV Labs for an "Excellent" rating and perfect test scores



G2 named ThreatDown EDR #1 on Usability Index. Carbon Black scored 7.85, compared to ThreatDown's 9.5.

Take complexity down

Carbon Black

- Built for large organizations with Security Operations Centers (SOC)
- Designed for well-funded security teams
- Complex implementation and fine tuning

ThreatDown

- Easy to navigate and operate
- One, lightweight agent
- Fast to install, no fine-tuning needed
- G2 named ThreatDown EDR "Most Implementable," "Fastest Implementation," and "Easiest to Use"

Take costs down

Multiple tools cost budget and resources to manage. ThreatDown Bundles provide a single, all-in-one solution that includes Application Block and Vulnerability Assessment for free.

Important threat prevention capabilities that Carbon Black doesn't offer, including Patch Management, DNS Filtering and Mobile Security, can be immediately added all from the same agent and console.

Head-to-head comparison

	ThreatDown	Carbon Black
Attack surface coverage	EDR, managed services, application blocking, vulnerability assessment, patch management, DNS Filtering and mobile device protection.	Offers NGAV, EDR, XDR and "light" managed services. Relies on partners to provide MDR-type services.
Automated deployment guidance	Security Advisor (included for all customers) offers a security score that reflects the current state of deployment, guidance on improvements and provides the ability to make the changes.	Does not offer any kind of automated guidance on the current effectiveness of a customer's deployment or how to improve.
Agent deployment	Single, lightweight agent that is automatically updated without any end user effort.	Customers report agent to be very slow and cumbersome to deploy and update.
Ransomware rollback	7-day Ransomware Rollback included with EDR; which helps you return to a pre-ransomware state without reimaging machines or recreating encrypted files.	"Ransomware Recovery" product dependent on VMware data backup technology.
Ease-of-use	Straightforward interface that depicts threats to a user's environment and recommends the appropriate action.	Products require extensive manual correlation in threats, taking up the limited time of IT/ Security teams.

Get started today

Not all cybersecurity vendors are created equal. ThreatDown offers elite endpoint security without a complicated platform to manage.
