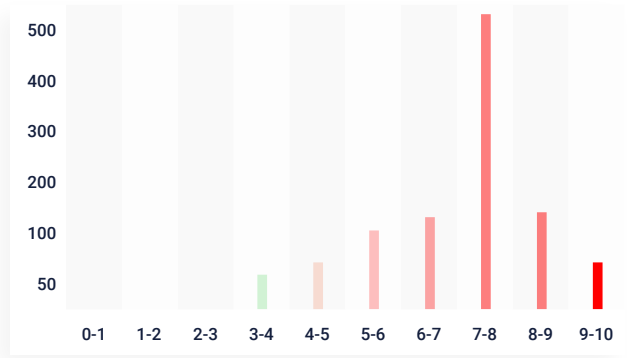
ThreatDown™
Powered by Malwarebytes

Don’t settle for vendors who are SOFT on threats

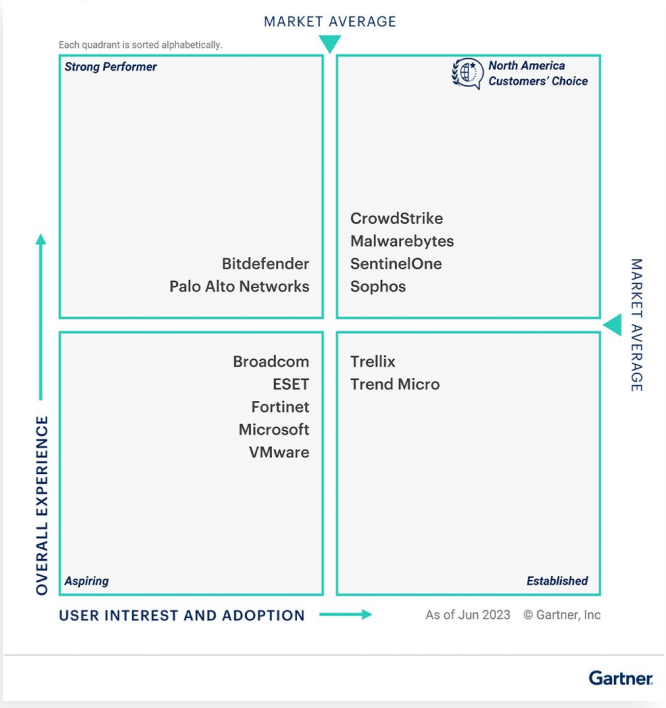
Take threats down

Last year, Microsoft products reached a record-breaking 1,292 vulnerabilities[1]. Don’t settle for **SOFT**.

ThreatDown solutions find what others miss. ThreatDown’s award-winning endpoint security solutions combine layers of protection, threat intelligence, and human expertise to protect organizations from ransomware and other threats.



Microsoft’s Common Vulnerability Scoring System (CVSS) average was 7.8, meaning most of its vulnerabilities were **High severity. Source: CVE Details**



Take complexity down

In the 2023 Gartner® Peer Insights™ Voice of the Customer report for Endpoint Protection Platform, Microsoft faced major criticism for its complexity[2]. Don’t settle for **SOFT**.

ThreatDown, powererd by Malwarebytes, was peer-recognized as a Customers’ Choice for North America in the same report.

ThreatDown solutions provide integrated protection through a single, lightweight agent, that’s fast to install an easy to manage.

- **4.7/5 ★ in Product Capabilities***
- **4.7/5 ★ in Deployment Experience***
- **4.6/5 ★ Overall Rating***

Take costs down

Anything “free” is tempting, but you know the deal: If it sounds too good to be true, it is. Don’t settle for **SOFT**: It’ll cost you. Missed threats lead to a global average of $4.45 million in breaches[3].

ThreatDown’s all-in-one solutions replace multiple outdated tools, saving you budget and resources. Vulnerability Assessment is included in all ThreatDown bundles while Microsoft charges extra.

Head-to-head comparison

	ThreatDown	Microsoft
Detection Coverage	Perfect score in AV Labs real-world threat tests for six consecutive quarters[4]	Misses threats; performs poorly in third-party testing[5]
Managed Services	Managed services included in three out of our four bundles	Doesn’t include managed services with even the most expensive licenses
Augmented Expertise	Managed Detection and Response (MDR) for 24x7 protection management	Incomplete MDR
Deployment	Deploys quickly and easily with strong out-of-the-box default settings	Complicated deployment with limited (to no) guidance
Ease-of-Use	“Easiest Admin” and “Easiest to Use” badges from G2 Fall 2023	Steep learning curve
Maintenance	Security Advisor eases optimization—right from dashboard	Burdensome to update and maintain
ROI	“Best ROI” badge from G2 Fall 2023 for shortest payback period	Cost of complexity is never ending
Total Cost of Ownership	Predictable cost structure that you can count on	Unpredictable, unaccounted costs
Support Lifecycle	Single lightweight agent for all our products, all your OSs for easy growth	Restrictive support lifecycle
