

# You Need More From Your Endpoint Security. You Need ThreatDown.

## ThreatDown vs ESET

Today's zero-day and fileless threats require the threat monitoring, investigation, and remediation capabilities of a tested and proven endpoint detection and response (EDR) solution that can stop or rollback ransomware and guide security posture improvements.

### Head-to-head comparison

	 <b>ThreatDown™</b>	ESET
<b>Ease of use</b>	<ul style="list-style-type: none"> <li>✓ Easy to install and easy to manage from a straightforward, user-friendly console.</li> </ul>	<ul style="list-style-type: none"> <li>✗ Customers report that implementation can be difficult and that management via the console is not very intuitive.</li> </ul>
<b>Automated deployment guidance</b>	<ul style="list-style-type: none"> <li>✓ Security Advisor (included for all customers) offers a security score that reflects the current state of the deployment, guidance on improvements and provides the ability to make the changes.</li> </ul>	<ul style="list-style-type: none"> <li>✗ Does not offer any kind of automated guidance on the current effectiveness of a customer's deployment or how to improve.</li> </ul>
<b>Agent deployment</b>	<ul style="list-style-type: none"> <li>✓ Single, lightweight agent that is automatically updated without any end user effort.</li> </ul>	<ul style="list-style-type: none"> <li>✗ Customers report that the agent negatively impacts the performance on the installed device.</li> </ul>
<b>Technology integrations</b>	<ul style="list-style-type: none"> <li>✓ Integrates with many of the most popular tools in categories such as RMM, PSA, SIEM, SOAR and more.</li> </ul>	<ul style="list-style-type: none"> <li>✗ Customers report that there are a very limited number of available integrations with other tools in their technology stack.</li> </ul>
<b>Ransomware rollback</b>	<ul style="list-style-type: none"> <li>✓ Restore files that were encrypted, deleted, or modified; up to 7 days after an attack.</li> </ul>	<ul style="list-style-type: none"> <li>✗ Not available.</li> </ul>
<b>Chromebook support</b>	<ul style="list-style-type: none"> <li>✓ Mobile Security, available as an add-on to any ThreatDown bundle, protects iOS, Android and ChromeOS.</li> </ul>	<ul style="list-style-type: none"> <li>✗ Mobile Security protection is limited to iOS and Android devices.</li> </ul>

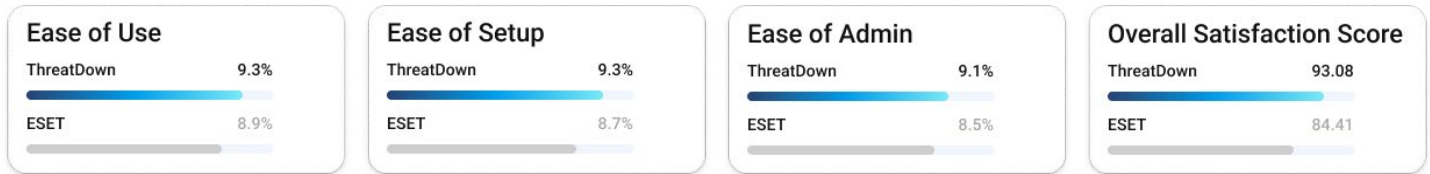

### Take threats down

- ThreatDown received EVERY award, 52 out of 52 awards, since Q3 2021, from independent testing lab MRG Effitas. Only vendor to consistently achieve 100% protection against ransomware, phishing, exploits, and every other real-world test. ESET missed the cuts for Level 1 certification many times.
- ThreatDown was awarded "Product of the Year 2024" by AV Labs for blocking 459/459 of "in-the-wild" malware samples while in the latest Advanced In-the-wild Malware Test, Threatdown earned a 100% protection score.

# Take complexity down

ThreatDown ranked #1 in the G2 Endpoint Protection Suites Usability Index, with the highest score of all vendors. ThreatDown's score of 9.27 is ahead of all other competitors including ESET.

## ESET

- No security healthcheck score to simplify optimizing security postures.
- Users highlight difficulty managing the console.
- Users note challenges with updating the agent.
- Users mention the need to address false positives.

## ThreatDown

- Deploys in minutes, easy to navigate, no fine-tuning.
- One, lightweight agent.
- Includes Security Advisor score and prioritized actions.
- G2 named ThreatDown EDR "Most Implementable," "Fastest Implementation," and "Easiest to Use."
- Protects mobile devices (iOS, Android, and ChromeOS).

# Take costs down

ThreatDown Bundles provide a single agent, single console, all-in-one solution that includes Application Block and Vulnerability Assessment in all solution options for free. ESET includes an extra charge for vulnerability assessment for half of their solution tier options.

Allowing ransomware and not recovering fast enough can have costly consequences. ThreatDown's 7-day ransomware rollback solution can restore files on endpoints up to 7 days after a ransomware attack, saving valuable resources. ESET does not have ransomware rollback leaving customers to be on their own for file recovery.

# Get started today

Not all cybersecurity vendors are created equal. ThreatDown offers elite endpoint security without a complicated platform to manage.
