

Maximized Protection Without Sacrificing Performance or Ease of Use

ThreatDown vs Trellix

Don't trust outdated, complicated solutions to fully protect your endpoints. ThreatDown offers customers powerfully simple endpoint security that takes down threats, takes down complexity, and takes down costs.

Head-to-head comparison

	 ThreatDown™	Trellix
Ease of use	✓ Easy to install and easy to manage from a straightforward, user-friendly console.	✗ Customers report that implementation can be difficult and that management via the console is challenging to navigate.
Ease of management	✓ Our bundles come with a number of endpoint security technologies that are pre-integrated and configured to work right out of the box.	✗ Offers a number of non-integrated endpoint security products that are not only challenging to install, but also require significant effort to manage & optimize.
Automated deployment guidance	✓ Security Advisor (included for all customers) offers a security score that reflects the current state of the deployment, guidance on improvements and provides the ability to make the changes.	✗ Does not offer any kind of automated guidance on the current effectiveness of a customer's deployment or how to improve.
Agent deployment	✓ Single, lightweight agent that is automatically updated without any end user effort.	✗ Customers report that the agent negatively impacts the performance on the installed device.
Managed services	✓ We offer Managed Detection and Response and Managed Threat Hunting with select bundles, services that are performed by our own employees leveraging our own technologies.	✗ Does not offer managed services. Relies on partners to provide Managed Detection and Response, which adds complexity.

Take threats down

- ThreatDown received EVERY award, 52 out of 52 awards, since Q3 2021, from independent testing lab MRG Effitas. ThreatDown is the only vendor to consistently achieve 100% protection against ransomware, phishing, exploits, and every other real-world test. Trellix does not participate in this test.
- ThreatDown was awarded "Product of the Year 2024" by AV Labs for blocking 459/459 of "in-the-wild" malware samples while in the latest Advanced In-the-wild Malware Test, Threatdown earned a 100% protection score whereas Trellix did not participate.

Take complexity down

ThreatDown ranked #1 in the G2 Endpoint Protection Suites Usability Index, with the highest score of all vendors. ThreatDown's score of 9.27 is ahead of all other competitors.

Trellix

- No security health check score to simplify optimizing security postures.
- Non-integrated endpoint security components are challenging to install and manage.
- Users report the agent negatively impacts performance.
- Product uses Volume Shadow Copy Service (VSS) for ransomware rollback that is easily disabled and rendered ineffective for recovering encrypted files.

ThreatDown

- Deploys in minutes, easy to navigate, no fine-tuning needed.
- One, lightweight agent.
- Includes Security Advisor score and prioritized actions.
- G2 named ThreatDown EDR "Most Implementable," "Fastest Implementation," and "Easiest to Use."
- Protects your organization's mobile devices (including: iOS, Android, and ChromeOS) without adding management complexity.

Take costs down

ThreatDown Bundles provide a single agent, single console, all-in-one solution that includes Application Block and Vulnerability Assessment in all bundle options for free. Trellix requires multiple non-integrated endpoint security components leading to greater management complexity and cost.

Allowing ransomware and not recovering fast enough can have costly consequences. ThreatDown's innovative, 7-day ransomware rollback solution can restore files on endpoints up to 7 days after a ransomware attack; saving valuable resources. Trellix relies on VSS for ransomware rollback which is easily disabled by attackers, leaving customers to be on their own for file recovery.

Get started today

Not all cybersecurity vendors are created equal. ThreatDown offers elite endpoint security without a complicated platform to manage.
