

# Superior Protection that Saves You Time and Effort

## ThreatDown vs SentinelOne

ThreatDown offers customers powerfully simple endpoint security that is purpose-built for everyone—not only companies with deep pockets and large security teams.

### Head-to-head comparison

	 <b>ThreatDown™</b>	<b>SentinelOne</b>
<b>Ease of use</b>	<ul style="list-style-type: none"> <li>✓ Easy to install and easy to manage from a straightforward, user-friendly console.</li> </ul>	<ul style="list-style-type: none"> <li>✗ Customers report that implementation can be difficult and time consuming.</li> </ul>
<b>Detection accuracy</b>	<ul style="list-style-type: none"> <li>✓ Our endpoint security products have been tested and have been shown to have very few false positives.</li> </ul>	<ul style="list-style-type: none"> <li>✗ Customers report that excessive false positives are generated.</li> </ul>
<b>Automated deployment guidance</b>	<ul style="list-style-type: none"> <li>✓ Security Advisor (included for all customers) offers a security score that reflects the current state of the deployment, guidance on improvements and provides the ability to make the changes.</li> </ul>	<ul style="list-style-type: none"> <li>✗ Does not offer any kind of automated guidance on the current effectiveness of a customer's deployment or how to improve.</li> </ul>
<b>Agent</b>	<ul style="list-style-type: none"> <li>✓ Single, lightweight agent that is automatically updated without any end user effort.</li> </ul>	<ul style="list-style-type: none"> <li>✗ Customers report that agents consume significant resources, negatively impacting performance.</li> </ul>
<b>Managed services</b>	<ul style="list-style-type: none"> <li>✓ Complete Managed Detection and Response services.</li> </ul>	<ul style="list-style-type: none"> <li>✗ Very limited MDR offering.</li> </ul>

### Take threats down

- ThreatDown received EVERY award, 52 out of 52 awards, since Q3 2021, from independent testing lab MRG Effitas. ThreatDown is the only vendor to consistently achieve 100% protection against ransomware, phishing, exploits, and every other real-world test. SentinelOne does not participate in this test.
- ThreatDown was awarded “Product of the Year 2024” by AV Labs for blocking 459/459 of “in-the-wild” malware samples while in the latest Advanced In-the-wild Malware Test, Threatdown earned a 100% protection score whereas SentinelOne did not participate.

# Take complexity down

ThreatDown ranked #1 in the G2 Endpoint Protection Suites Usability Index, with the highest score of all vendors. ThreatDown's score of 9.27 is ahead of all other competitors including SentinelOne.

## SentinelOne

- No security health check score to simplify optimizing security postures.
- Users highlight difficult and time-consuming implementation.
- Users report the agent consumes significant resources that impact performance.
- Product uses Volume Shadow Copy Service (VSS) for ransomware rollback that is easily disabled and rendered ineffective for recovering encrypted files.

## ThreatDown

- Deploys in minutes, easy to navigate, no fine-tuning needed.
- One, lightweight agent.
- Includes Security Advisor score and prioritized actions.
- G2 named ThreatDown EDR “Most Implementable,” “Fastest Implementation,” and “Easiest to Use.”
- Protects your organization’s mobile devices (including: iOS, Android, and ChromeOS) without adding management complexity.

# Take costs down

ThreatDown Bundles provide a single agent, single console, all-in-one solution that includes Application Block and Vulnerability Assessment in all bundle options for free. SentinelOne charges exorbitant prices. Compare their least expensive bundle with EDR at \$159.99 per endpoint compared to ThreatDown Advanced at \$79 (less than half the price with EDR plus so much more functionality vs. SentinelOne).

Allowing ransomware and not recovering fast enough can have costly consequences. ThreatDown’s innovative, 7-day ransomware rollback solution can restore files on endpoints up to 7 days after a ransomware attack; saving valuable resources. SentinelOne relies on VSS for ransomware rollback which is easily disabled by attackers, leaving customers to be on their own for file recovery.

# Get started today

Not all cybersecurity vendors are created equal. ThreatDown offers elite endpoint security without a complicated platform to manage.
